**FOR IMMEDIATE RELEASE**

## **THE CONSTITUTION PARTY IS GOING TO CPAC!**

**###**

**Lancaster, PA (November 1, 2017) The Constitution Party announced today that they will have a booth at the Conservative Political Action Conference (CPAC) 2017 to be held in National Harbor, Maryland on February 21-24, 2018.**

Thanks to a generous donation by Jeff Bothen, and under the leadership of Scott Copeland (Chairman of the Constitution Party of Texas/Constitution Party National Executive Committee Member), a team has been put together to ensure that the Constitution Party booth will be what everyone is talking about at CPAC 2017!

The focus of the Constitution Party at the event will be on promoting its “Three Pillars” of good government policies. They include:

**1<sup>st</sup> Pillar - We are committed to restoring honesty, integrity, and accountability to government.**

*We will hold all our party officers and leaders strictly accountable for their conduct. They will be held to the highest ethical standards in dealing with the public, donors, government officials, and candidates. Corrupt candidates come from corrupt parties. Honest and honorable candidates can only come from a party that insists that all its leaders have the same characteristics. Constitution Party candidates will sign legally binding contracts that will obligate them to keep their campaign promises.*

**2<sup>nd</sup> Pillar - We feel that: “Government is the most ineffective, inefficient, and most expensive way to get anything done.” As such, we are offering innovative and effective non-government solutions to the country’s social spending issues.**

*As a society, we should be solving social spending issues via non-government organizations that want to SOLVE the problem, not just FUND the problem. We should seek out those organizations that have the best solutions.*

*The solution is to transition America slowly and responsibly from ineffective government programs to effective non-government institutions. Our solution will ensure that recipients of current government programs are still cared for but allows for more effective solutions to be implemented.*

**3<sup>rd</sup> Pillar - We want to create the greatest economy for the U.S. that the world has ever seen. We will do so by restoring True Capitalist (vice Crony Capitalist) principles to our economic policies.**

*That Small Businesses, not large corporations, are the key to a healthy economy.*

*That True Capitalism is achieved by allowing strong competition among companies. In order to have the best pricing, the best products, and the best services, you need to ensure that every company has an even playing field and can fairly compete for our business.*

*That job creation comes from business creation and growth. Removal of restrictive government regulation, fees, and taxes combined with responsible trade agreements with foreign governments will ensure massive business and job growth*

Gary Welch, National Communications Director for the Constitution Party stated, “We know that many conservatives are tired of the GOP giving them lip service but failing to promote conservative values. Their recent failure to repeal Obamacare shows that they have another agenda that is different than their conservative base. The time has come to quit trying to reform a party that is actively opposing conservative and constitutional candidates. We offer a very viable solution for the American people that provides for integrity in government, an effective solution to social problems, and the greatest prosperity that this country has ever seen”.

We encourage all CPAC attendees to stop by the Constitution Party booth and find out why the best solution for our government is a Constitutional Government.
